PROFESSIONAL SUMMARY

Software and AI developer with hands-on experience building full-stack web applications, AI-powered systems, machine learning solutions, voice agents, and document-based AI tools. Comfortable working across frontend, backend, databases, APIs, cloud deployment, and AI integrations. Experienced with React.js, Node.js, Flask, Python, PostgreSQL, MongoDB, machine learning, LLMs, LangChain, LangGraph, Azure services, vector databases, and voice AI.

TECHNICAL SKILLS

Frontend: React.js, HTML5, CSS3, Tailwind CSS, ShadCN UI

Backend: Node.js, Flask (Python), Express.js

Programming: Python, JavaScript

Databases: PostgreSQL, MongoDB, Vector Databases

AI / Machine Learning: NumPy, Pandas, Scikit-learn, TensorFlow, PyTorch, Matplotlib

NLP: NLTK, spaCy, TextBlob

Generative AI: LLM Integration, LangChain, LangGraph, Ollama, Google Gemini API, Prompt Engineering

Document AI: Azure Document Intelligence, Embeddings, Vector Search

AI/ML Concepts: Supervised Learning, Classification, Regression, Model Evaluation, Explainable AI

Voice AI: Voice Agents, Sarvam API

Cloud & Tools: Microsoft Azure, Git, GitHub

EXPERIENCE

Hybrid Software Developer | Ultrion Tech | Hyderabad, India | 13 April 2026 – 13 July 2026

- Worked on full-stack and AI-based applications for clients in Australia and India.
- Built a web platform for an Australian client who operates multiple car wash outlets, with booking and management features for the business.
- Developed a voice agent platform for an Indian bank where employees can create multiple agents for different tasks and handle inbound and outbound customer calls.
- Used LangChain and LangGraph to build and manage voice-agent workflows and task flows.
- Worked on an AI-powered Hospital Management System with AI-integrated features for healthcare workflows.
- Developed a customer churn and banking product recommendation system using internal and external data and machine learning models.
- Added Explainable AI to show why a particular banking product was recommended to a customer.
- Built customer communication flows using WhatsApp, SMS, email, and voice calls.
- Used Sarvam API for voice interactions with a focus on Indian languages.
- Built and deployed AI applications using Microsoft Azure and worked with document processing, embeddings, and vector search.

AI & Full-Stack Development Intern | GenAI Lakes Pvt. Ltd., Hyderabad | May 2025 – Jul 2025

- Developed AI-powered and full-stack web applications for education and hiring platforms.
- Integrated Ollama and Google Gemini API for AI-based automation and content generation.
- Built responsive frontend interfaces using React.js and Tailwind CSS.

- Developed backend APIs using Flask and Node.js.
- Worked with PostgreSQL and MongoDB for structured and unstructured data.
- Improved application stability through testing, debugging, and optimization.

Full-Stack Development Intern | Nirvaha Wellness Center | Feb 15, 2026 – Mar 30, 2026

- Designed and developed a full-stack web application across frontend, backend, and database layers.
- Built responsive interfaces using React.js.
- Developed REST APIs using Flask (Python).
- Integrated MongoDB for data storage and retrieval.
- Implemented API integrations with external services.

PROJECTS

Legal Copilot for Lawyers | React.js, Python/Flask, Azure Document Intelligence, LLMs, Embeddings, Vector Database, Microsoft Azure

- Built an AI tool for lawyers to review and work with legal documents.
- Used Azure Document Intelligence to extract and process information from legal documents.
- Added document creation and review workflows to help lawyers work with their files.
- Used embeddings and a vector database to support document search and retrieval.
- Added document sharing so lawyers could share work across different branches of their law firm.
- Deployed the application on Microsoft Azure.

AI Voice Banking Agent Platform | React.js, Python/Flask, LangChain, LangGraph, Sarvam API, Voice AI

- Built a voice agent platform for an Indian banking use case.
- Allowed bank employees to create and manage multiple voice agents for different tasks.
- Supported both inbound and outbound customer calls.
- Used LangChain and LangGraph to build agent workflows and manage task-based conversations.
- Integrated Sarvam API for voice interactions with a focus on Indian languages.

Car Wash Booking & Management Platform | React.js, Full-Stack Web Development, Database, API Integration

- Built a web application for an Australian client with multiple car wash outlets.
- Added customer booking features for car wash services.
- Developed management features to help the business handle bookings and outlet operations.

AI-Powered Hospital Management System | React.js, Python/Flask, Database, AI Integration

- Developed a full-stack hospital management system with AI-integrated features.
- Built workflows for healthcare operations and management.
- Worked across frontend, backend, database, API integration, and AI features.

Customer Churn Prediction & Product Recommendation | Python, Pandas, NumPy, Scikit-learn, Machine Learning, Explainable AI

- Built a machine learning system to analyze customer data and predict customers who may churn.
- Used internal and external data to analyze customer behavior and recommend suitable banking products.
- Added Explainable AI to show the reasons behind product recommendations.
- Designed follow-up communication through WhatsApp, SMS, email, and voice calls.
- Used Sarvam API for voice communication with a focus on Indian languages.

Studyf – Full-Stack Web Application | React.js, Flask, MongoDB, ShadCN UI

- Developed a full-stack web application using React.js and Flask.
- Built responsive interfaces using ShadCN UI and modern UI libraries.

- Designed and managed the MongoDB database.
- Worked across frontend, backend APIs, and database development.

FastJob99 – AI-Powered Instant Hiring Platform | React.js, Node.js, Flask, PostgreSQL, Ollama

- Built an AI-based pre-interview preparation module that analyzes resumes and job descriptions.
- Used LLMs to generate role-specific interview questions and preparation guidance.
- Developed backend APIs and integrated LLM workflows.
- Built frontend, backend, and database features.

Crack Orbit – AI-Powered JEE/NEET Preparation Platform | React.js, Node.js, PostgreSQL, Ollama, Google Gemini API

- Developed an AI-powered learning platform with LLM-based question generation and adaptive mock tests.
- Integrated Ollama and Google Gemini API for questions, explanations, and personalized learning.
- Built full-stack components using React.js, Flask, Node.js, and databases.

AU Event Hub – Event Management System | React.js, Node.js, Express.js, PostgreSQL, MongoDB

- Built a full-stack platform for event creation, discovery, and registration.
- Designed a dual-database setup using PostgreSQL and MongoDB.
- Optimized data flow by routing queries based on data type.

Emotion-Based Movie Recommender | Python, Flask, React, NLP, TextBlob

- Built an NLP system that analyzes emotions from user text using TextBlob.
- Used sentiment analysis to generate personalized movie recommendations.
- Created an interactive interface for real-time input and results.

EDUCATION

Bachelor of Technology – Artificial Intelligence and Machine Learning | Aurora Deemed To Be University | 2024 – 2028

Intermediate | Sri Chaitanya College | 2023 | 76%

Matriculation (ICSE) | Sri Sai Public School | 2021 | 85%

CERTIFICATIONS

MongoDB Overview

ACHIEVEMENTS

- Secured 1st Prize in Ideathon 2025 at Aurora Deemed To Be University for presenting an innovative solution.
- Selected for first internship during 1st year of undergraduate studies at GenAI Lakes Pvt. Ltd. (T-Hub hybrid internship program).
- Initiated and developed Teenique.in, an online fashion store, as a freelance full-stack project during the first year of undergraduate studies.
- Awarded Best Committee – AMATRIN Sports Event 2025 at Aurora University for outstanding contribution and team performance.
