PROFESSIONAL SUMMARY

Software and AI developer with hands-on experience in building scalable full-stack and AI-powered applications. Skilled in developing end-to-end systems using React.js, Flask, and databases, along with integrating Large Language Models for intelligent automation. Passionate about building innovative solutions that solve real-world problems.

SKILLS

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Flask (Python)

Programming: Python

Databases: PostgreSQL, MongoDB

AI / Machine Learning:

- **Libraries:** NumPy, Pandas, Scikit-learn, TensorFlow, PyTorch, Matplotlib
- **NLP:** NLTK, spaCy, TextBlob
- **Concepts:** Supervised Learning, Classification, Regression, Model Evaluation
- **Technologies:** Generative AI, LLM Integration, Ollama, Google Gemini API
- **Concepts:** Prompt Engineering, Text Processing

Tools: Git, GitHub

EXPERIENCE

AI & Full-Stack Development Intern

GenAI Lakes Pvt. Ltd., Hyderabad | May 2025 – Jul 2025

- Developed AI-powered and full-stack web applications for education and hiring platforms.
- Integrated Large Language Models using Ollama and Google Gemini API for intelligent automation and content generation.
- Built responsive frontend interfaces using React.js and Tailwind CSS.
- Developed backend APIs using Flask and Node.js to support scalable application features.
- Managed structured and unstructured data using PostgreSQL and MongoDB.
- Improved application stability through testing, debugging, and optimization.

Full-Stack Development Intern

Nirvaha Wellness Center | Feb 15, 2026 – Mar 30, 2026

- Designed and implemented a full-stack web application across frontend, backend, and database layers to streamline organizational workflows.
- Contributed to IT system development and platform design for internal process support.
- Built responsive frontend interfaces using React.js for improved user experience.
- Developed RESTful APIs using Flask (Python) for backend services and business logic.
- Integrated MongoDB for efficient data storage and retrieval.
- Implemented API integrations to connect external services and enhance functionality.

PROJECTS

Studlyf – Full-Stack Web Application

Technologies: React.js, Flask (Python), MongoDB, ShadCN UI

- Developed a full-stack web application using React.js for frontend and Flask for backend services.
- Built modern and responsive user interfaces using ShadCN UI and modern UI libraries.
- Designed and managed database architecture using MongoDB.
- Worked across frontend, backend API development, and database design.
- Integrated all components to ensure smooth and reliable application performance.

FastJob99 – AI-Powered Instant Hiring Platform

Technologies: React.js, Node.js, Flask (Python), PostgreSQL, Ollama

- Built an AI-based pre-interview preparation module that analyzes resumes and job descriptions to generate role-specific questions and preparation guidance using Large Language Models (LLMs).
- Implemented backend APIs and integrated LLM workflows to automate candidate evaluation and preparation processes.
- Developed full-stack features including frontend interfaces, backend services, and database integration.

Crack Orbit – AI-Powered JEE/NEET Preparation Platform

Technologies: React.js, Node.js, PostgreSQL, Ollama, Google Gemini API

- Developed an AI-powered learning platform featuring LLM-based question generation and adaptive mock tests.
- Integrated Ollama and Google Gemini API for intelligent content generation, explanations, and personalized learning support.
- Built full-stack application components using React.js, Python (Flask), Node.js, and database systems.

AU Event Hub – Event Management System

Technologies: React.js, Node.js, Express.js, PostgreSQL, MongoDB

- Designed a dual database architecture using PostgreSQL and MongoDB for efficient data handling.
- Built a full-stack system for event creation, discovery, and registration workflows.
- Optimized data flow by routing queries based on data type.

Emotion-Based Movie Recommender

Technologies: Python, Flask, React, NLP, TextBlob

- Developed an NLP-based system to analyze user emotions from text input using TextBlob.
- Implemented sentiment analysis techniques to generate personalized movie recommendations.
- Built an interactive interface for real-time user input and results.

EDUCATION

Bachelor of Technology – Artificial Intelligence and Machine Learning

Aurora Deemed To Be University | 2024 – 2028

Intermediate

Sri Chaitanya College | 2023 | 76%

Matriculation (ICSE)

Sri Sai Public School | 2021 | 85%

CERTIFICATIONS

Mongodb overview

https://www.linkedin.com/redir/redirect/?url=https%3A%2F%2Fwww%2Ecredly%2Ecom%2Fbadges%2F037303d5-014f-4ad0-a335-f0bcc59564b5%2Flinked_in_profile&urlhash=1ncB&isSdui=true

ACHIEVEMENTS

- Secured 1st Prize in Ideathon 2025 at Aurora Deemed To Be University for presenting an innovative solution.
- Selected for first internship during 1st year of undergraduate studies at GenAI Lakes Pvt. Ltd. (T-Hub hybrid internship program).
- Initiated and developed a freelance full-stack project (Teenique.in), an online fashion store, during the first year of undergraduate studies.
- Awarded Best Committee – AMATRIN Sports Event 2025 at Aurora University for outstanding contribution and team performance.
