

Polla Vishnu Vardhan

8523851643 | vishnumaxpolla32@gmail.com | [Linkedin](#)
Hyderabad, Telangana, India

EDUCATION

Aurora Deemed to be University

Bachelor of Technology in Artificial Intelligence and Machine Learning

Hyderabad, India

Sept 2023 – Sept 2027

Sri Chaitanya College of Education

Intermediate, Mathematics-Physics-Chemistry (MPC)

Hyderabad, India

Sept 2021 – May 2023

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, SQL, HTML, CSS

Frameworks & Libraries: Bootstrap, React, TensorFlow, scikit-learn, pandas, NumPy

AI/ML: LLMs, Generative AI

Tools & Technologies: Git, GitHub, GitLab, Streamlit, Docker, Jupyter, VS Code, Canva, Bootstrap

Core Competencies: Data Structures & Algorithms, Problem Solving, Front-End Development, Video Editing

PROFESSIONAL EXPERIENCE

AI/ML Intern

VISWAM.AI (IIT Hyderabad)

May 2025 – Aug 2025

Hyderabad, India

- Contributed to cutting-edge AI/ML research and development projects at IIT Hyderabad incubated startup
- Applied machine learning algorithms and deep learning techniques to solve real-world problems
- Collaborated with research teams on innovative AI solutions and generative AI applications
- Gained hands-on experience with production-level AI systems and industry best practices

Web Development Intern

CodSoft

May 2025 – July 2025

Hyderabad, India

- Developed responsive web applications using HTML, CSS, JavaScript, and Bootstrap framework
- Implemented front-end features with focus on user experience and performance optimization
- Built full-stack components integrating Node.js backend with MySQL databases
- Collaborated in agile development environment utilizing Git version control

Python Development Intern

Cognifyz Technologies

June 2024 – Aug 2024

Hyderabad, India

- Developed Python applications focusing on data processing, automation, and analysis
- Implemented algorithms and data structures to optimize code performance and efficiency
- Worked with Python libraries including pandas, NumPy for data manipulation tasks
- Delivered multiple projects demonstrating strong problem-solving and coding capabilities

C/C++ Development Intern

Cognifyz Technologies

June 2024 – July 2024

Hyderabad, India

- Implemented complex algorithms and data structures using C/C++ programming
- Optimized code for memory management and computational efficiency
- Developed understanding of low-level programming and system architecture

PROJECTS

Machine Learning Projects: Developed end-to-end ML pipelines including data preprocessing, model training, and deployment using Python and scikit-learn

Generative AI Applications: Built applications leveraging LLMs and generative models for content creation and automation

Full-Stack Web Applications: Created responsive web applications with React frontend and Node.js backend with MySQL integration

Competitive Programming: Active problem solver on coding platforms, strengthening DSA and algorithmic thinking

Video Editing Portfolio: Created professional video content using modern editing tools demonstrating creativity and technical proficiency

ACHIEVEMENTS

- Won Best Hack in Open Innovation in BuildWith organized by HackPrix, CodeforChange, Starknet Foundation.
- 2nd Runner-up in DATANYX for the Best Project in MedTech Domain organized by Muffakham Jah College of Engineering and Technology, AWS, SMC.
- Won 1st Prize in Agentic AI Hackathon organized by AI Innovators Club, Aurora deemed University.
- Won 1st Prize in Mini Hackathon: Code Battle organized by Game Development Club, Aurora deemed University.
- Best Club – CodeVerse Club Recognized for consistent contributions, technical excellence, and leadership within the club.
- Elected Class Representative, demonstrating leadership, communication, and organizational skills in coordinating between faculty and students.
