

# VIVEK GOUD ADULA

Hyderabad • adulavivekgoud@gmail.com • +91-9381118626 • [LinkedIn](#) • [GitHub](#)

## PROFESSIONAL SUMMARY

---

A passionate and hardworking coding enthusiast with a strong commitment to learning and problem-solving. My strengths in logical thinking, adaptability, and teamwork enable me to excel in collaborative environments. Highly disciplined and detail-oriented, I quickly grasp new technologies and concepts, making me a valuable contributor in any coding environment. With a growth mindset and determination, I aim to contribute my skills and enthusiasm to the coding community.

## SKILLS

---

- **Programming Languages:** Python, MySQL, React JS, NODE JS, C, PostgreSQL
- **Tools:** Git, GitHub
- **Soft Skills:** Leadership, Public Speaking, Communication

## INTERNSHIP EXPERIENCE

---

**Viswam.AI, Swecha Foundation, IIIT-H, Artificial Intelligence Intern** [Hybrid] May 2025 – August 2025

- Developed Streamlit-based AI applications integrating Hugging Face models for interactive Q&A.
- Built RAG - Retrieval-Augmented Generation chatbots for generating accurate AI-powered summaries.
- Implemented LLM integration, tokenization, and prompt handling for domain-specific queries.

**GENAI Lakes, T-HUB, Artificial Intelligence Intern** [Hybrid] May 2025 – July 2025

- Developed AI-based NEET & JEE Mock Testing Platform (Crack Orbit) using React, Node.js, and PostgreSQL.
- Built backend for Face Recognition Attendance System with Python (FastAPI) and PostgreSQL.
- Integrated Gemini API for AI-powered resume parsing in ATS module, storing structured data in PostgreSQL.
- Implemented Job Description matching system to connect parsed resumes with recruiter postings.
- Collaborated in full-stack development, API integration, and database design for live platforms.

**Garuda3D, AIML Research, Designing, Digital Marketing** [Offline] June 2024 – August 2024

- During my internship at Garuda 3D, I have done research on AI and ML, focusing on 3D print failure detection by AI.
- I created professional designs using Canva, for Garuda 3D's products and services.
- I contributed to digital marketing efforts, creating content like Instagram posts, Google AdSense templates.

**Cognifyz Technologies, Python development** [Online] May 2024

- Crafted a Python-based automation script that reduced manual data entry time by 15 hours per week, this initiative not only saved time but also improved data accuracy and enhanced reporting capabilities for the team.

## EDUCATION

---

**Bachelor of Technology (Computer Science with AIML)** October 2023 -Present  
Aurora deemed University **Percentage – 92.5%**

**Intermediate - (MPC)** May 2023  
Sri Chaitanya Junior College **Percentage – 90.8%**

**Class 10<sup>th</sup> – (SSC)** May 2021  
Vijaya High school **CGPA 10**

## PROJECTS

---

**AI-Based Pre-Interview Preparation System** May 2025 – July 2025

- Engineered a personalized interview preparation tool where users upload their resume and job description, and the system generates tailored preparation topics using GenAI models.
- Developed AI-generated study content and structured module-wise quizzes that guide users through role-specific interview readiness.

- Integrated resume parsing, JD analysis, topic generation, and quiz modules into one cohesive pipeline with an intelligent pre-interview preparation layer.

### AI-Powered Applicant Tracking System

May 2025 – July 2025

- Built an AI-driven resume analysis pipeline that extracts key information from uploaded resumes and stores structured data in the database using FastAPI and Python.
- Implemented job description (JD) handling where recruiters can upload JDs, which are then processed and linked with AI-generated candidate matching results.
- Designed a matching module that identifies the best-fit candidates for each JD and integrated the entire solution with a Gradio-based user interface for quick testing and demos.

### A holistic design and collaboration for accident rescue app

October 2024 – November 2024

- Designed an integrated system for accident response, using real-time tracking and smartphone sensors to detect accidents and alert emergency services.
- Collaborated on a platform that facilitates coordination among emergency responders, optimizing response times and resource allocation for improved post-accident care.

### Energy consumption prediction using LSTM and RNN

October 2024 – November 2024

- Developed an energy consumption prediction model using LSTM and RNN, enhancing forecasting accuracy based on historical data.
- Optimized data processing techniques to improve model efficiency and reliability for energy prediction.

### Student performance prediction using linear regression

October 2024 – November 2024

- Developed a model using linear regression to predict student performance based on factors like attendance, assignments, and prior grades.
- Analyzed academic data to identify key predictors of student success and improved model accuracy using performance metrics like MSE and R-squared.

## ACHIEVEMENTS

---

- Won **Best Hack in Open Innovation in BuildWith** organized by HackPrix, CodeforChange, Starknet Foundation.
- **2<sup>nd</sup> Runner-up in DATANYX** for the **Best Project in MedTech Domain** organized by Muffakham Jah College of Engineering and Technology, AWS, SMC.
- Won **1<sup>st</sup> Prize in Agentic AI Hackathon** organized by AI Innovators Club, Aurora deemed University.
- Won **1<sup>st</sup> Prize in Mini Hackathon: Code Battle** organized by Game Development Club, Aurora deemed University.
- **Best Club – CodeVerse Club** Recognized for consistent contributions, technical excellence, and leadership within the club.
- **Certificate of Academic Excellence** at Aurora deemed University for securing 1<sup>st</sup> rank in the Freshman year of B. Tech Computer Science and Engineering (AIML) Program for the Academic year 2023-2024.
- **Certificate of Academic Excellence** at Aurora deemed University for securing 1<sup>st</sup> rank in the Sophomore year – First Term of B. Tech Computer Science and Engineering (AIML) Program for the Academic year 2024-2025.
- **Campus Ambassador** at Tech Mindsparc Innovations (July 2024) - Improved leadership skills while aiding colleagues in enhancing their proficiency.
- **Campus Executive** at Skill Vertex (April 2024) - Supported peers in advancing their career prospects through mentorship and guidance.
- **ELITE PROFESSIONAL Member** at IEEE (30 July) – for grading in 5 Voices Bootcamp: Unlock the Hidden Potential Inside Your Team.
- **ICASEM 2024** (30 May 2024 - 31 May 2024): Published a paper abstract titled 'Unlocking the Power of Matrix Multiplication in Image Processing'.
- Participated in **Smart India Hackathon 2024**

## CERTIFICATIONS

---

- **Deloitte Australia Technology Job Simulation on Forage - December 2025**  
- Completed a job simulation involving development and coding

- Wrote a proposal for creating a dashboard
- **Infosys Spring Board** – Introduction to Artificial Intelligence and Machine Learning
- **Microsoft** – Fundamental AI concepts
- **IBM** – Python for Data Science
- **Udemy** – Python Programming - For Every Beginners
- **National Intellectual Property Awareness Mission (NIPAM)** - IP Awareness/Training program
- **Infosys Spring Board** – Python Certification
- **University of Washington, Coursera** - Dynamic Public Speaking
